

CREATE A WIKI PAGE

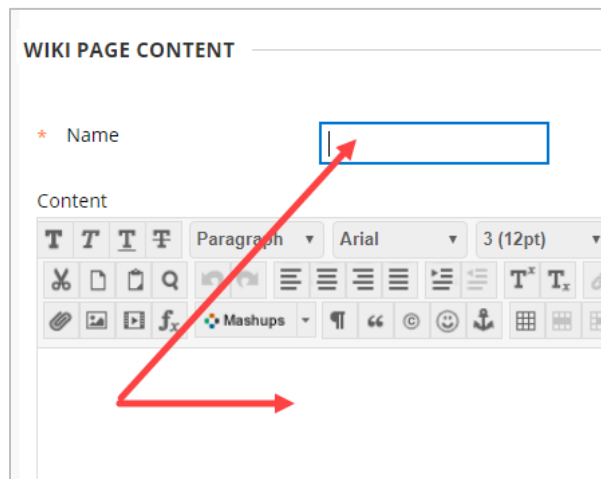

Some courses require students to contribute to wiki pages. A wiki is a collaborative space for all users to add, modify, or delete content on the page. Your instructor will give you instructions about what content to build in each wiki page and you can contribute the text, images, links, and documents to existing or new wiki pages.

Instructions

1. Navigate to the wiki assigned in the content area folder or link on the left side menu.

2. Click a Name for the wiki page and add any content necessary in the text editor box.

Note:

When a student is updating a wiki page, the rest of the students are locked out of it until it is released.

3. Click **Submit** to save your wiki page.

4. The newly created wiki page will be listed in the **Wiki Details** area on the right side of the page. It can be edited at any time by clicking **Edit Wiki Content**.

CREATE A WIKI PAGE

The screenshot shows a web interface for a Wiki page. At the top, there is a header bar with "Wiki Instructions ^" on the left and "Wiki Details v" on the right. Below the header, a message states: "This space has been created for you and your group to work on your project." The main content area is titled "Group 1" and contains a "Created By" field with a greyed-out name. To the right of this field is a button labeled "Edit Wiki Content", which is highlighted with a red box. Below the content area is a "Comment" button. On the right side of the interface, there is a sidebar with a "Wiki Details" dropdown menu. This menu is also highlighted with a red box and shows "GROUP PROJECT" and "Group 1" with a lock icon.
